  - Well written
- English
  - Business English Certification (BULATS) Level C1
  - Quite well spoken
  - Well read
  - Well written

---

## Experience

SINCE DECEMBER 2020

### Freelance Developer / The Coding Machine (TCM)

TCM is specialized since several years in Open-Source development and oversees every project at the heart of the customer's digital strategy. I'm working as a Freelance developer on several project with TCM. I mostly in charge of integrating and creating dynamic components that are used on many other projects.

#### Projects I worked on:

➤ **Atlas Project (2020 – 2022)**

MetricStream's ATLAS Application provides a highly scalable audit workflow with demanding security controls to ensure full compliance with Auditing Standards; enabling a highly tailored approach based on professional judgment built around a pertinent assessment of risks, with a full audit trail from risk assessment to work programs to audit conclusions, and compilation of this work into standardized reports.

It enables a lean administration of the core content and embedded methodology and algorithms from a Mazars central team with limited additional content managed in local countries, with strong administration protocols, to guarantee full adherence to demanding auditing standards globally and locally. Be supported by sound technology that enables teams to work together productively on audit files, in the office and remotely at clients (including in offline mode where required) while maintaining the integrity of the files and data within them through effective synchronization, and ensuring full compliance with data security legislations.

Technologies used: Symfony, NuxtJs, Docker

Role: Coding and Integration of the components used on the application (VueJs2)

➤ **Quick Contract (2021)**

Quick contract is a STANHOME project to organize and manage contracts with the company.

Technologies used: Angular, HTML5, CSS3, JS

Role: Coding and Integration of the components used on the application (HTML5, CSS3, JS)

Link: <https://contrat.stanhome.fr/>

➤ **Prologue (2021 – 2022)**

Prologue is an application that will be used by works supervisors to make provisional schedules of construction sites and in the idea, they will be able to validate their schedule and make comparisons with other tools.

Technologies used: Symfony, VueJs3, Docker

Role: Coding and Integration of the components used on the application (VueJs3, HTML5, CSS3)

JULY 27, 2020 – FEBRUARY 28, 2021

## **Computer Works Engineer / ITEBEMA SARL U**

In order to be able to support my thesis in a Master of Research in Software Engineering, I worked as IT engineer within the said company. My main tasks are to write specifications for different projects, establish quotes, coach and assist junior developers.

SINCE JANUARY 2019

## **Application Developer Consultant / Devidia**

At the end of my contract with TIC BUILDER, the associated French agency called Devidia offered me a consultant position. I am responsible for the creation and maintenance of websites according to well-defined specifications.

CEO Devidia: Mr. Eddy BEGHENNOU - Tel: +33 6 46 75 06 64 – email: [b.eddy@devidia.net](mailto:b.eddy@devidia.net)

### **Completed projects:**

#### ➤ **Balaruc Cosmétiques**

Development of an e-commerce site for "Balaruc Cosmétiques".

Technologies used: Prestashop, PHP, Javascript

Link: <https://www.balaruc-cosmetique.com/>

#### ➤ **Camion Services**

Development (frontend) of all interfaces, client and administration part.

Technologies used: HTML5, CSS3, Javascript, Laravel

Link: <https://camion-services.com/>

FEBRUARY 15, 2017 - DECEMBER 31, 2018

## **Frontend Developer / TIC BUILDER**

Teleworking with the French agency Devidia from the premises of TIC BUILDER, I was working as a Frontend developer.

Manager Tic Builder: M. Marc K. TAMEKLOE - Tel: +228 91 04 43 60 – email: [marckodjo@tic-builder.com](mailto:marckodjo@tic-builder.com)

### **Completed projects**

#### ➤ **Leaderbox**

I was a Front-end developer of the storage box estimation page, from a model.

Technologies used: HTML5, CSS3, Javascript, Symfony

Link: <https://www.leaderbox.fr/conseils-et-promos/evaluer-box-2/>

➤ **Ushuaïa beauté**

Frontend developer on the Wordpress theme development project from a mockup for the design of the site of the "Ushuaïa Beauté" company

Technologies used: Wordpress, PHP, Javascript

Link: <https://www.ushuaia-beaute.fr/>

➤ **Carrere Promotion**

Frontend developer on the proposed creation site web "Groupe Carrere"

Technologies used: Drupal, PHP, Javascript

Link: <https://www.carrere-promotion.com/>

➤ **Soladis Group**

Developer on the Soladis Group website creation project from a model.

Technologies used: Wordpress, PHP, Javascript

Link: <https://www.soladis.com/>

➤ **Serma Group**

Developer of the Wordpress theme for the Serma Group multisite.

Technologies used: Wordpress, PHP, Javascript

Link: <https://www.serma.com/>

➤ **Yokosushi**

Frontend developer of the online ordering site for the Yokosushi restaurant from precise models.

Technologies used: VueJs, Laravel

Link: <https://www.yokosushi.fr/>

➤ **Cynomateriel**

Frontend developer of the Cynomateriel dog sports equipment sales site.

Technologies used: Prestashop, PHP, Javascript

Link: <https://www.cynomateriel.com/>

---

## Schooling

NOVEMBER 2019

### **BULATS English Certification /**

The BULATS is a **business English test** that allows you to assess your level of English in a professional context.

This English assessment test allows you to obtain an international certification recognized in the professional environment as well as within the framework of the Personal Training Account (CPF).

SINCE OCTOBER 2018

### **International Professional Master/ CIC / UTBM**

This is a two (02) year training course with a view to obtaining the diploma of International Professional Master in Software Engineering. The training is delocalized from the University of Belfort-Montbéliard (UTBM France) which takes place in the premises of the Computer and Computing Center (CIC) at the University of Lome.

2013 - 2016

### **Bachelor of Computer Engineering Cycle / Institut Africain d'Informatique (IAI)**

This is a three (03) year training course for obtaining the Programmer Analyst diploma.

2011 - 2013

### **2<sup>nd</sup> Year of License in Economics/ FASEG-UL**

After my baccalaureate, I continued my training in economics at the Faculty of Economics and Management (FASEG) at the University of Lome.

2011

### **High school Diploma in Sciences / Groupe Scolaire Amitié – Concorde**

---

## Activities / Hobbies

In my spare time, I like to do computer hacking, play video games, sometimes play basketball. I also love Japanese culture and Pop music.
