VISION

As a Java developer, my goal is to leverage my programming and problem-solving skills in Java and Angular, to contribute collaboratively within a development team. My goal is to continue learning in a dynamic environment, while creating high-quality software solutions.

CONTACTS

- kuessiansandjiyehoue@gmail.com
- 0022870020490
- Lomé, TOGO

SCHOOL

PROFESSIONAL BACHELOR'S DEGREE IN SOFTWARE ENGINEERING.
Ecole Polytechnique de Lomé
(CIC - University of Lomé)
2023

TECHNOLOGIES

- Java
- Spring Boot
- Typescript
- Angular
- Hibernate
- JPA
- .SQL
- Git
- AWS

SKILLS

- Teamwork
- Communication
- Time Management
- Adaptability
- Project Management
- Continuous Learning

Kuessi-Ansan Manuel DJIYEHOUE

SOFTWARE DEVELOPER

Java developer with a solid background in Angular. I am passionate about programming and dedicated to transforming creative and efficient web solutions into reality.

EXPERIENCE

SOFTWARE DEVELOPER LA FORGE
October 2022 – October 2023

I have extensive experience in Full Stack development, seamlessly combining Angular for the front-end and Java with Spring Boot for the back-end. On the front-end, I specialize in designing attractive web applications using Angular, HTML, CSS, and Typescript. On the back-end, I excel in working with Java Spring Boot, Spring Data JPA, and PostgreSQL to create RESTful APIs for seamless data integration.

Among other things, I have worked on:

- Development of Macantosh, an online canteen web platform. (Angular, Java/Spring Boot, AWS)
- Development of the Macantosh back office for automatic order management. (Angular, Java/Springboot, AWS)
- Angular training for Lomé Business School students
- Support and follow-up of interns.

SOFTWARE DEVELOPMENT TRAINEE LA FORGE
July 2022 – October 2022

During my internship, I significantly improved my Java and Spring Boot skills through hands-on programming and debugging. I also strengthened my mastery of Angular. I have gained knowledge in AWS CloudFormation for infrastructure management and have demonstrated strong problem-solving skills. I collaborated effectively with team members, managed multiple tasks, and used JIRA for project task tracking and clear communication.

Among other things, I have worked on:

- Development of a web platform to connect trainers and learners.
- Automation of CodeCommit, CodeBuild, and S3 repositories creation processes on AWS using CloudFormation.
- Project Management
