TRANSCRIPT

Nov. 2018 - Feb. 2019

- In my third year of Computer Science bachelor: Developed a web application (with a friend) in Django allowing the management of grades and the automatic production of transcripts for IFNTI students.

Skills

Advanced Algorithms and Data Structure, APIs/Backend Development, Web Development, Java, Javascript, Python, Groovy, PHP, Spring Boot, Django, Laravel, PostgreSQL, MySQL, Data Analysis, GIT

Medium WSO2, Kotlin, TypeScript, NodeJS, Angular, React, MongoDB, Mobile development, Bash

Beginner Oracle, Haskell, Assembly Programming

Communication Class representative in my third year of Computer Science. I served as a bridge between my comrades and the administration. In the same year, instructor on JEE technology and functional programming with Haskell.

Team work I like working in teams and appreciate sharing and learning from others.

Problem solving This is the whole reason i have chosen to study computer science. My hunger to learn and face new challenges drive me to seek innovative solutions.
