Developper

Christian Lindner hat die Dinge gerade nicht richtig im Griff. Der FDP-Chef gibt nach außen den in sich ruhenden Finanzminister, aber die Ereignisse der vergangenen Tage zeugen von erhöhter Nervosität. Sein Agieren stellt den Koalitionsfrieden auf eine ernste Probe.

Critical thinking is the analysis of available facts, evidence, observations, and arguments to form a judgment.[1] The subject is complex; several different definitions exist, which generally include the rational, skeptical, and unbiased analysis or evaluation of factual evidence. Critical thinking is self-directed, self-disciplined, self-monitored, and self-corrective thinking.[2] It presupposes assent to rigorous standards of excellence and mindful command of their use. It entails effective communication and problem-solving abilities as well as a commitment to overcome native egocentrism[3][4] and sociocentrism.
