Summary

I am a software developer with 5 year of experience in developing web back-end services in a variety of domains. My strongest skills are python, react, nodejs, spring boot and php. I'm experienced in design system architectures and solutions for rapid scaling. I have significant experience working with startups and fast-moving teams with fixed deadlines. I am very flexible with different technologies and methodologies, and I am able to learn and adapt to new environments quickly.

Skill Highlights
